

FOKKER 100. Innovative. In service. Incomparable.

“ We're proud to be the first airline in Latin America to fly the Fokker 100. Following the launch of TAM's highly successful first-class services on our shuttle flights between Rio and Sao Paulo, the introduction of the Fokker 100 — one of the world's most sophisticated jetliners — is another major step in TAM's establishing new industry standards in Brazil. For our demanding business travelers, these 100-seat, Rolls-Royce Tay-powered jets enhance the superior levels of passenger comfort and services we introduced with our Fokker F27 Friendships. For us, the versatility, economic advantages and ultra-quiet performance of the Fokker 100 make it a good tool for growth. ”

Captain Rolim Amaro
President
